DETAILED ACTION

Allowable Subject Matter

1. Claims 1-20 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: claims 1, 11 and 16 recite, inter alia, "a voltage divider circuit disposed on a circuit board and coupled between a first node and the second connection, the voltage divider circuit having an output configured to provide measurable voltage signals to a circuit operable to generate voltage measurement information, the voltage divider circuit having a first impedance value; a series impedance element disposed apart from the circuit board, the series impedance element configured for current limiting and coupled between the first connection and the node, the series impedance having a second impedance value." In addition, by providing such a series impedance element that helps reduce the potential for damaging due to line surges in electricity meters.

The art of record does not disclose the above limitations, nor would it be obvious to modify the art of record so as to include the above limitations. Although Sutterlin (U.S. 5,485,040) disclose a Power line-coupling network and Hahn et al. (U.S. 5,432,916) disclose a Precharge for non-disruptive bus live insertion, they do not disclose the above-mentioned limitations.

Conclusion

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
